

Dinotopia, First Flight: 20th Anniversary Edition

This lavishly produced volume begins with an unabridged republication of Gurneys influential 1999 story about the adventures of Gideon Altaire. Gideon escapes from his post as a drone pilot, befriends a small band of animal characters, and becomes the first human to fly on the back of a giant pterosaur known as a skybax. Together they challenge a bold attempt by the rogue leaders of Poseidos to overturn the tenuous balance between humans and dinosaurs. The second half of the book includes a bonus of over 45 new images, including never-before-published storyboards, concept sketches, and production paintings, plus new characters, stories, and backstory notes from James Gurneys creative archives. The supplement begins with a cinematic treatment about a character named Blake Terrapin, who leads the resistance on the ground while Gideon takes to the air. Together, the elements of this richly imagined volume combine to conjure a complete world, and will serve as an exciting companion volume to Gurneys other Dinotopia books.
