

# ISO 15500-2:2001, Road vehicles -- Compressed natural gas (CNG) fuel system components -- Part 2: Performance and general test methods

This part of ISO 15500 specifies performance and general test methods for compressed natural gas fuel system components intended for use on the types of motor vehicles defined in ISO 3833. This part of ISO 15500 is applicable to vehicles using natural gas in accordance with ISO 15403 (mono-fuel, bi-fuel or dual-fuel applications). It is not applicable to the following: liquefied natural gas (LNG) fuel system components located upstream of, and including, the vaporizer; fuel containers; stationary gas engines; container mounting hardware; electronic fuel management; refuelling receptacles. This title may contain less than 24 pages of technical content.
