

Living! (Science Readers)

Can you spot whether something is living or not living? Learn all about living things and inanimate objects in this colorful, engaging science reader! With clear, easy-to-read text combined with familiar images, young readers will be able to comprehend these examples and master an understanding of things that are living and not living. This reader also includes a fun science activity and practice problems to give students additional practice in sorting living and not living things. A helpful glossary and index are also included.
