

TOADS

TOADS shares the wonder of childhood and beauty of nature through the eyes of young children. Where do the toads go in the morn when the moon goes down and the sun grows warm? The soft, gentle rhyme and alliteration encourages children to take time to search for the toads in the beautiful water color pages while wondering where the toads hide and what they are doing when they cannot be found. Do they head for the beach?..Will they snack on mosquitoes? In a very subtle way, TOADS encourages parents to talk to their children about the challenges faced by the little creatures of this planet. Will they come out in the light of the lamp?
